Web Designer & Developer

Sep 2021 – Feb 2021

- Maintaining 6 websites of College of Visual Arts & Design (<https://cvad.unt.edu/>) department with good accessibility and SEO score.
- Redesigning and evaluating a web platform for a university's department using user-centered design process and WCAG guidelines to ensure that the product is accessible and inclusive.
- Creating new features to connect more students with department. Designing and implementing UI updates.
- Upgrading user interface for better user experience
- Preparing monthly analytical reports for each website and social media platform to increase the user engagement.

PROJECTS

Case Study: Enhance UX of food delivery app DoorDash

Feb 2022 – Mar 2022

- In this case study, I tried to identify some of the issues that users encounter while ordering food via the popular food delivery app DoorDash. Later, I tried to figure out a feasible solution in UI design to overcome certain difficulties.
- Checkout the complete case-study on Medium <https://bootcamp.uxdesign.cc/case-study-enhance-ux-of-food-delivery-app-door-dash-1824a5b46fd3>

Redesigning User On-Boarding Process (Case Study)

Dec 2021 – Jan 2022

- The reason behind redesigning is to make the onboarding process quick, easy, and user-friendly. So that more people can sign up and connect with other professionals.
- For the redesigning process, I tried to keep users always center of my every design decision. Sometimes the smallest design improvements make the biggest difference.
